

Cervical cancer and sexually transmitted infection (STI) screening

ThinPrep®: comprehensive testing from 1 vial, 1 specimen

Cervical cancer and sexually transmitted infection (STI) screening are an important part of keeping your female patients healthy. Quest Diagnostics offers comprehensive testing with 1 specimen collection, including highly sensitive and specific cytology (Pap) and molecular testing.

A simple way to order

How SMART codes can make it easier

SMART test codes are comprised of imaged Pap testing with HPV and additional STI tests, appropriate for her age, based on professional guidelines.^a

- Send in the specimen using ThinPrep®, and provide the patient's date of birth
- Choose 1 of the 3 codes in this table ▶
