

ThinPrep®: comprehensive testing from one vial, one specimen

Cervical cancer and sexually transmitted infection (STI) screening are an important part of keeping your female patients healthy. Quest Diagnostics offers comprehensive testing with one specimen collection, including highly sensitive and specific cytology (Pap) and molecular testing.

Image-guided Pap with age-based screening protocols—Quest Diagnostics SMART Codes

SMART test codes are comprised of imaged Pap testing with HPV and additional STI tests, appropriate for her age, based on professional guidelines.^a

- Send in the specimen using ThinPrep®, and provide the patient's date of birth
- Choose one of the 3 codes in this table
