

POWERING AFFORDABLE CARE

by helping you manage staffing shortages

Lab testing is the single highest-volume medical activity affecting Americans, and staffing shortages may be impacting health systems' ability to deliver the testing patients need.¹

As the world's leading provider of diagnostic information services, **Quest Diagnostics can help bridge staffing challenges with customized solutions to meet your lab workforce needs.**

Short-term solutions

To mitigate immediate staffing challenges, we can help:

Reduce strain on staff by temporarily sending more tests to our labs

Deliver timely, actionable results you need to support patient care

Audit in-house test menus to optimize current resources

Evaluate current workflows and staffing strategies to maximize productivity

Long-term solutions

Our customized lab solutions provide specialized resources and services including:

Lab management to help optimize nearly every aspect of your lab operations

Collaborative outreach models can be more competitively and financially advantageous

Shared services that help broaden your selection of esoteric tests without the associated investment in advanced equipment and training

Lab stewardship that can help improve overall test utilization

Whether you need immediate staffing support or a strategic partnership for long-term staffing success, **we can help.**
